

## ENERGY STAR® Equipment from Delfield

### Commercial Solid Door Refrigerators

ENERGY STAR labeled commercial solid door refrigerators and freezers are designed to help save money on your utility bills and reduce energy waste.

#### What can ENERGY STAR labeled commercial solid door refrigerators and freezers save me?

ENERGY STAR labeled commercial solid door refrigerators and freezers are more energy efficient because they are designed with components such as ECM evaporator and condenser fan motors, hot gas anti-sweat heaters, or high-efficiency compressors, which will significantly reduce energy consumption and utility bills. Compared to standard models, ENERGY STAR labeled commercial solid door refrigerators and freezers can lead to energy savings of as much as 35% with a 1.3 year payback. By buying commercial solid door refrigerators and freezers, purchasers can expect to save \$170 annually per refrigerator and \$120 per freezer. Replacing all existing commercial solid door refrigerators and freezers in the US with ENERGY STAR labeled models would result in savings of almost \$250 million per year, or roughly 25% of the energy consumed by models currently on the market — the equivalent of eliminating the emissions from 475,000 cars.
